Gary-

Thank you for your comments. My I ask which reports are you referring to? Thanks.

Subject: CES

Rodney:

I have been reviewing the reports being submitted by the PRP Group on activities conducted. The following are my concerns:

1. It appears that only minimal activities have been conducted based upon the reports;
2. It is my understanding that the group is preparing the sampling plan for the on-site areas of the property but is not preparing plans for off-site sampling. I believe that this should be done concurrently with the on-site sampling.
3. Attached you will see my attempt to identify the remaining needs of the site upon the EPA's completion. This is the same document that I previously sent to you.

Thanks

Gary Moore
